# STOP DISMEMBERMENT ABORTION

## The UNBORN CHILD PROTECTION FROM DISMEMBERMENT ABORTION ACT

- This bill would outlaw a form of abortion defined as “purposely to dismember a living unborn child and extract him or her one piece at a time from the uterus.”
- Dismemberment abortions are performed between 14 and 24 weeks and are the most common form of abortion used in the second trimester (96% of abortions done).
- Every year approximately 100,000 unborn babies die from abortions after the first trimester and most of these are Dismemberment Abortions.
- This is the method of abortion used by the Planned Parenthood abortionists to harvest baby body parts as described in the recently-released undercover videos.
- Second trimester babies are fully formed with all organs in place. Teeth, fingernails and fingerprints are present. The heart has been beating, pumping the baby’s own blood type. Brain waves can be recorded, and babies can kick, swim and grasp objects placed in their hands. After 20 weeks, the unborn baby can feel the pain of the abortion.

### WHAT YOU CAN DO TO HELP

- **Contact your state Delegates and Senators at 1-877-565-3447. Ask them to pass the Unborn Child Protection from Dismemberment Abortion Act as early as possible during the next Session, which begins 1/13/16.**
- **Plan now to attend *Pro-Life Rally Day* in the State Capitol on Tuesday, February 16, 2016, to support passage of this legislation to protect West Virginia’s unborn babies from pain and suffering.**
